

Environmental Statement

Uttoxeter Dental Practice regard reducing our impact on the environment and making better use of existing resources as key to our continued success as a business. Listed below are some of the key points in how we reduce our impact on the environmental:

- We use a digital XRAY system whereby we don't create liquid waste of developer & fixer chemicals
- We use tablets for FP17's, Estimates and Medical Histories to reduce paper usage.
- We use products that can be recycled where a choice exists.
- We segregate waste & recycle via local collection points.
- We use low energy lights whenever we can.
- We are located near to a train station to reduce use of cars
- Team members are encouraged to switch unused equipment off and ensure everything is turned off at night
- We recycle batteries and ink cartridges
- We have amalgam separators and filtration to prevent amalgam entering drains
- We store waste amalgam and capsules in airtight containers to prevent mercury vapours escaping
- Use of air-conditioning is kept to a minimum
- We use email & text messages more, to reduce need for appointment cards
